Professional Summary

Gameplay-focused Unity and Python game programmer with hands-on experience developing real-time gameplay systems, player controllers, enemy AI, shooting mechanics, collision detection, and physics-based interactions. Skilled in object-oriented programming, gameplay architecture, debugging, and scalable system design. Passionate about creating responsive gameplay experiences and optimized game systems for 2D and 3D games.

Technical Skills

Programming Languages	C#, Python, C++ (Basic)
Game Engines	Unity Engine, Arcade Framework
Gameplay Systems	Player Controller, Enemy AI, Shooting Systems, Collision Detection, Health Systems, Scoring Systems
Core Concepts	Object-Oriented Programming (OOP), State Machines, Event Systems, Game Loop Architecture, Modular Programming
Physics & Math	Vector Math, Trigonometry, Physics-Based Movement, Rigidbody Mechanics
Tools & Platforms	Git, GitHub, Itch.io, Visual Studio

Projects

2D Space Shooter

Python, Arcade

- Developed a real-time 2D shooter game with player movement, aiming mechanics, projectile systems, and responsive shooting controls.
- Implemented enemy AI behavior including dynamic spawning, movement tracking, and combat interactions.
- Built collision detection and health management systems for gameplay interactions and combat feedback.
- Designed scoring systems, UI elements, and gameplay loop architecture for smooth player experience.
- Applied modular programming principles for scalable and maintainable code structure.
- Play Game — [GitHub Repository](#)

Magic Snake 2D

Unity, C#

- Developed a grid-based 2D gameplay system with responsive player input and movement mechanics.
- Implemented collision handling, scoring systems, and gameplay state management.
- Structured gameplay logic using modular scripts and reusable game systems.
- [GitHub Repository](#) — [Gameplay Demo](#)

Unity Car Controller

Unity, C#

- Built a physics-based vehicle controller using Unity WheelCollider components.
- Implemented acceleration, steering, braking, and responsive driving mechanics.
- Worked with Unity physics systems, Rigidbody components, and player input handling.
- [GitHub Repository](#) — [Gameplay Demo](#)

Education

B.Tech in Computer Science and Engineering

2023 – Present

Amity University Chhattisgarh

Higher Secondary Education (Physics, Chemistry, Mathematics)

2021 – 2023

St. Joseph English Medium School
